

Process Analyzer Sample-Conditioning System Technology

Robert E. Sherman, Author, 2002

This new resource provides both the novice and the experienced technologist with the technical background necessary to choose sample conditioning system components that will allow the process analyzer system to function reliably with minimal maintenance. The conditioned process sample presented to the process analyzer should be of similar quality to the calibration material used to zero and span the analyzer.

System Concept

Filling a long-standing void in the process field, this book addresses the System Concept of process analyzer sample-conditioning system technology in light of the critical importance of delivering a representative sample of the process stream to the process analyzer.

Component Detail

This volume offers a detailed description of the equipment necessary to properly prepare the process samples; it lists two or more vendors (when available) for equipment reviewed, plus much more for both the novice and the experienced individual.

Reference Resource

Process Analyzer Sample-Conditioning System Technology gives technologist new to the field of Process Analyzer Systems a basic source of design parameters and a reference list of performance-proven components (see Appendices A and B). This volume also provides the experienced professional with a valuable reference to complement his or her field Process Analyzer System experience.

Table of Contents

Preface
Chapter 1: Sample Probes
Chapter 2: Sample Transfer Lines
Chapter 3: Particulate Filters
Chapter 4: Sample Coolers
Chapter 5: Sample Pumps
• Rotary (Centrifugal, Gear, Vane)
• Metering (Bellows, Diaphragm, Infusion, Peristaltic, Piston, Positive Displacement)
• Ejector (Jet)
Chapter 6: Gas—Liquid/Liquid—Liquid Separation Devices
Chapter 7: Sample Flow Rate Measurement and Control
Chapter 8: Sample Pressure Measurement and Control
Chapter 9: Material Considerations
Chapter 10: Enclosures and their Electrical-Hazard Rating
Chapter 11: Enclosures and their Climate Control
Chapter 12: System and Component Examples: Systems That Worked and Why They Worked; Systems That Did Not Work and Why They Did Not Work

Appendices

Appendix A: System Component Source Summary (Alphabetical)
Appendix B: System Component Source Summary (Chapter/Subject)
Appendix C: Typical Enclosure and Walk-in-Process Analyzer System Shelter Documentation Drawing Packages
Appendix D: Conversion Factors and Reference Tables for Process Analyzer Sample-conditioning System Design
Appendix E: ISA Analysis Division Technical Interest Groups
Appendix F: Two Guides for Sizing Sample Lines and Flow Indicators
